

Lego factory visit

On 25th June 2015 students, professors and IEEE members from the College of Nyíregyháza visited one of the most famous companies in the world, seated in Hungary. They were invited to a 3 hour detailed company tour to LEGO, Nyíregyháza.

During their visit young professionals got an inside view into LEGO's life, got familiar with the history of the company and went around the factory. LEGO's IT department was a great experience for the IT professionals, while engineers were impressed by the multi-level automatic warehouse system and precise manufacturing process.

At the end of the tour IEEE professionals were enriched with a lot of experience and an inevitable present, a LEGO figure keychain.
